WORK EXPERIENCE

Sr. Frontend Developer

Nutrifactor Laboratories Pvt Ltd.

09/2024 - Present

Faisalabad, Pakistan

Achievements/Tasks

- Developed user interfaces using React.js with a focus on responsive, reusable components and clean code.
- Used Shopify Polaris to implement and customize reusable components, enhancing the user experience in various Shopify apps.
- Designed and implemented custom components and UI elements, aligning with company's requirements and branding guidelines.
- Customized the Nutrifactor website's design, ensuring an improved and cohesive user interface.
- Worked on the frontend development of Shopify apps using React, Redux Toolkit, and React Query for efficient state management and data caching.
- Revamped the entire user interface of a React Native e-commerce app, using React Native and React Native Paper, delivering a modern and seamless experience.
- Ensured code quality and performance through adherence to industry best practices, version control (Git), and close collaboration with QA teams for smooth deployments.

Frontend Developer

Dzine Media

09/2021 - 09/2024

Faisalabad, Pakistan

Achievements/Tasks

- Led over 30 projects using Tailwind, Bootstrap and React.js, creating dynamic, responsive user interfaces.
- Ensured SEO-friendly, standards-compliant code by adhering to W3C guidelines and core web vital principles.
- Collaborated closely with QA teams for high-quality, error-free code deployment, enhancing application performance.
- Translated Figma and XD designs into pixel-perfect code, showcasing strong UI/UX implementation skills.
- Utilized Git for version control and worked with backend developers to ensure seamless system integration.
- Conducted regular code reviews and provided constructive feedback to maintain code quality and promote best practices.
- Applied advanced CSS techniques for intricate animations and customized code, boosting visual appeal and interactivity.

Trainee Web developer

The University of Faisalabad

04/2021 - 8/2021

Achievements/Tasks

- Design mockups and wireframes for intuitive user interfaces.
- Research to optimize usability and user satisfaction.
- Translate designs into high-quality code using HTML, CSS, and JavaScript. Ensure accessibility and compliance with web standards.
- Perform user testing to gather feedback and make iterative improvements.
- Collaborate with cross-functional teams to align design and development goals.
- Assisted in developing responsive website features using HTML, CSS, and JavaScript, contributing to a 50% improvement in user engagement and overall site interaction.

PERSONAL PROJECTS

Game Search Website (Game Hub)

Developed a comprehensive game search website designed to help users find detailed information about various video games. The website features a user-friendly interface, advanced search capabilities, and up-to-date game data from multiple sources. Utilized HTML, CSS, and JavaScript to create a responsive and visually appealing user interface. Integrated Bootstrap to achieve responsive designs and React.js to enhance component-based architecture, improving page load time by 40%. Researched and analyzed user behavior and preferences using data analytics tools, contributing to a 25% increase in user engagement and retention rates by optimizing search algorithms and personalized recommendations.

Flight booking app (Bliss Flight)

Developed a user-friendly flight booking app utilizing Swift and Firebase, achieving a 50% increase in user engagement and a 30% boost in bookings within the first three months of launch. Developed and launched a flight booking app using Swift and Node.js, achieving over 50,000 downloads and maintaining a 4.8-star rating on the App Store by enhancing user experience, integrating seamless payment gateways, and implementing real-time ticket updates.
